Risk Notes:

Company registration confirms **existence** only. **No refinery ownership**, export license, allocation authority, or regulated **oil & gas trading** status has been verified. Registration alone is frequently **misused by scam sellers** to create **false credibility**.

3. Website & Digital Presence Review

Official Website Provided:

Website Functionality & Content:

- Corporate information
- Oil & gas activity clear

Domain & Email Review:

- Official corporate email
- Free/public email domain
- Domain age and creation

Confidential – For intended recipient only. Redistribution without consent is prohibited.

Online Footprint:

- Legitimate online presence: ✗ No
- Signs of impersonation or copied content: ⚠ Likely (generic industry language)

Risk Assessment:

The website is recently created, lacks **historical presence**, and has no independent references. This is a strong risk indicator, especially for a **seller claiming multi-million-barrel supply** capability.

4. Seller Contact & Communication Review

Transaction Type: TTT / TTV / TTO / VTT

Commercial Red Flags:

- Prices far below market: ☒ Not extreme
- Unrealistic quantities or timelines: ☒ Yes

Observation:

Offering **multiple global-origin** products in massive quantities without verified **allocation or refinery authority** is commercially unrealistic.

Document Integrity Summary:

The SCO is heavily templated, uses **boilerplate legal language**, lists excessive **POP documents**, and **lacks signatures** or third-party verification. This structure is commonly associated with **fraudulent offers**.

11. Key Red Flags Identified

- No **verified refinery** or allocation authority
- No proof of **past oil & gas** transactions
- New website domain with **no** operational **history**
- Generic SCO template with **excessive procedural** steps
- Mixed and **contradictory origin** claims
- Lack of **banking** transparency
- Informal communication channels inconsistent with **institutional trade**

12. Final Risk Rating & Conclusion

Final Risk Rating:  **HIGH RISK**

Conclusion:

Based on the cumulative findings, this **seller** presents a **high risk** profile. While corporate registration **exists**, **multiple critical scam** indicators are present, including lack of **supply authority**, **absence of trade history**, non-transparent **banking structure**, and templated documentation.

Recommendation:

 We strongly recommend **NOT proceeding** with any transaction, payment, document **exchange**, or **engagement with this seller**. The risk of **financial loss or fraud exposure** is significant.

13. Scope & Disclaimer

This **due diligence** review is based on **seller-provided information**, open-source intelligence, and observed **oil & gas fraud** patterns at the time of review. This report is for informational and **risk-assessment** purposes only and does not constitute **legal or financial advice**.
