

SELLER DUE DILIGENCE & RISK REVIEW REPORT

BY STOP OIL SCAM TEAM

Seller Due Diligence & Risk Review | Ref: SOS-DD-2026-002 | 20/02/2026

Prepared by : STOP OIL SCAM TEAM

Review Type: Independent Seller Due Diligence & Risk Assessment

Date of Review: 20/02/2026

Seller Risk Level: ● HIGH RISK

Report Reference ID: SOS-DD-2026-002

1. Executive Summary

This investigation examines the oil and gas trading offer issued by **(XXXXXX)** through a Full Corporate Offer (FCO) proposing the sale of petroleum products including **EN590 diesel, Jet A1 aviation fuel, D6 fuel oil, sulfur, and urea.**

The seller claims to operate as a **refinery supplier** capable of delivering large-scale volumes under multiple procedures including **CIF, FOB, TTT, TTV, STS, and Title Take-Over transactions.**

However, the investigation identified **multiple critical risk** indicators commonly associated with international oil trading **fraud schemes.** These include unrealistic **pricing structures, questionable operational** procedures, unverifiable logistics capability, and multiple procedural mechanisms that require **buyer-side payments** before verifiable product confirmation.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

While the company appears legally **registered in Kazakhstan**, the commercial claims, operational structure, and **transaction procedures** present significant **inconsistencies with legitimate** petroleum trading practices.

Overall Risk Assessment:

● HIGH RISK

Key reasons:

- Offer pricing far **below market** benchmarks
- Scam-pattern procedures involving **advance** payments
- No verified refinery **allocation or supply** source
- New, **low-credibility** website domain
- **Non-corporate** communication channels
- Multiple template-style **Proof of Product** documents
- High-risk **"Title Take-Over"** payment structure

The overall pattern strongly resembles known template **FCO scam** structures used in international petroleum fraud cases.

2. Seller Identity Overview

Seller Company Name:	(XXXXXX)
Country of Registration:	Kazakhstan
Registered Address:	(XXXXXX)
Company Registration Number:	(XXXXXX)
Date of Incorporation:	08 September 2010
Declared Business Activities:	Wholesale trade of crude oil and associated gas.
Authorized Oil & Gas Trading Status:	Registered as a trading entity, not an oil producer or refinery operator.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

Initial Observations

The company appears officially registered in **Kazakhstan** with an activity classification related to **oil trading**. However, **no evidence** was identified that the company owns **refineries, oil fields, or production** infrastructure.

The **legal address** corresponds to an office building located in a commercial district of **Almaty**, not an **industrial or energy production** site.

3. Corporate & Legal Verification

Registry analysis **confirms** the company is **active within Kazakhstan's** corporate database.

Verification indicators:

- Company **registration** exists
- **Business status** listed as active
- Not recorded as **bankrupt**
- Not listed among **inactive** enterprises
- No public record of **corporate** liquidation

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

However, corporate legitimacy does **not automatically confirm** trading capability in the international petroleum market.

Observed Limitations

- No **evidence** of refinery ownership
- No **oil field** licenses
- No **export** authorization documentation provided
- No **international** trading history identified

These limitations significantly **weaken** the **credibility of large-scale** supply claims.

4. Beneficial Ownership & Management Analysis

Director: (XXXXXX)

Operational Contact Listed in FCO: (XXXXXX)

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

Risk Indicators

- Limited **public** professional footprint for key executives
- No confirmed international commodity **trading history**
- **No verified** refinery mandates

In legitimate oil trading operations, senior executives typically maintain visible **industry profiles** and **professional networks**, which were not identified in this case.

5. Website & Digital Presence Investigation

Seller website: (XXXXXX)

Website Analysis

Key observations:

- Domain age approximately **2–3 years**
- Limited **corporate** information

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

- Minimal operational **transparency**
- **Weak** professional presentation
- Possible hosting **outside Kazakhstan**

In professional **oil trading companies**, corporate websites normally include:

- **refinery** affiliations
- shipping **partners**
- **compliance** certifications —
- global trading **references**

These elements are **largely absent**.

Digital Credibility Risk

Low.

6. Online Reputation & Intelligence Scan

An intelligence scan across:

- **business** directories
- industry **forums**
- **scam** monitoring platforms
- corporate intelligence **networks**

found very **limited public** footprint..

Observations

- **No verified** large-scale oil trading deals
- No visible refinery **partnerships**
- **No verifiable** trading references

A lack of verifiable market presence is a **common pattern** in **fraudulent commodity sellers**.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

7. Seller Contact & Communication Assessment

Primary contact method:

Phone / WhatsApp: (XXXXXX)

Emails: (XXXXXX)

Risk Observations

- Communication appears **mobile-based** rather than corporate infrastructure
- No listed landline **office number**
- Reliance on **WhatsApp** communication

Professional oil trading firms normally operate through:

- **corporate** switchboard numbers
- dedicated **trading desks**

The communication setup appears informal for a company claiming **multi-million-ton supply** capacity.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

8. SCO Document Authenticity Review

The reviewed FCO document includes:

- **corporate** letterhead
- contact **details**
- transaction procedures.

However several structural concerns were identified:

- **formatting** inconsistencies
- grammatical **errors**
- **multiple repeated** document sections
- template-style language common in **scam FCO documents**

These indicators reduce confidence in the **authenticity of the offer**.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

9. Product & Commercial Offer Review

Products offered:

- EN590 Diesel (10PPM / 50PPM)
- Jet A1 Aviation Fuel
- D6 Virgin Fuel Oil
- Sulfur
- Urea

Proposed Supply Volumes

Examples:

- Diesel: 50,000 MT spot / 100,000 MT monthly
- Jet A1: up to 2,000,000 barrels monthly
- D6 Fuel Oil: up to 100,000,000 gallons monthly.

Such **volumes normally** require **major refinery or national oil** company backing, which was **not demonstrated**.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

10. Market Price Validation

Quoted prices:

Diesel EN590: \$340–\$370 + commission

Jet A1: \$56–\$60 per barrel

D6 Fuel Oil: \$0.72–\$0.76 per gallon.

Market Comparison

These prices appear significantly **below typical global** market ranges.

Unrealistically discounted **fuel offers are a classic** indicator of petroleum **trading scams**.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

11. Refinery & Supply Source Verification

The **FCO** claims the seller is a “**reputable refinery and supplier** operating in Kazakhstan.”

However the document does **not identify** any specific **refinery or supply allocation**.

No supporting documentation was provided for:

- refinery **authorization**
- **product** allocation
- refinery **mandate**

Without **refinery confirmation**, the supply claims remain unverified.

12. Logistics & Supply Chain Capability

Legitimate suppliers normally demonstrate:

- refinery **authorization**
- **product** allocation
- refinery **mandate**

No evidence was presented confirming these capabilities.

The seller claims ability to deliver globally under **CIF ASWP terms**, which normally requires established **shipping infrastructure**.

Such infrastructure was **not verified**.

13. Port & Terminal Verification

The SCO does not clearly identify:

- loading **terminals**
- **storage** facilities
- **port authority** approvals

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

Lack of defined logistics points is a major credibility gap.

14. Transaction Procedure Risk Analysis

The document proposes numerous procedures including:

- Tank-to-Tank (**TTT**)
- Tank-to-Vessel (**TTV**)
- Ship-to-Ship (**STS**)
- Title Take-Over (**TTO**)
- **CIF** delivery.

Many of these **procedures include buyer-side payments** prior to confirmed product verification, including:

- tank extension **fees**
- terminal **permit** payments
- title **transfer** payments

These structures strongly resemble known **commodity scam** patterns.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

15. POP Documents Risk Assessment

The seller promises numerous Proof of Product documents:

Examples:

- **SGS** reports
- product **passport**
- **allocation** letters
- reservoir **receipts**
- **certificates** of origin

However these are template documents commonly used in **fraudulent** FCO packages.

No independent verification of these documents was provided.

16. Banking & Financial Structure Review

The FCO does not provide:

- **bank** name
- **SWIFT** code
- **financial** institution details

This lack of transparency is unusual for high-value commodity transactions.

17. Financial Transparency Assessment

No financial documentation provided:

- audited **financial** statements
- **balance** sheets
- **credit** references

This significantly increases risk.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

18. Past Transaction & Track Record Review

No evidence was provided of past deliveries.

Typical proof would include:

- Bills of **Lading**
- **SGS** inspection reports
- **export** documents

None were supplied.

19. Supply Chain Credibility Assessment

Claimed supply chain: **Refinery → Storage → Vessel → Buyer**

However:

- refinery **not** identified
- storage **not** verified
- shipping **not** confirmed

The supply chain **cannot** currently be validated.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

21. Risk Scoring Matrix

Category	Score
Corporate Legitimacy	Medium
Supply Verification	Very Low
Logistics Capability	Very Low
Financial Transparency	Low
Document Authenticity	Low

Overall Credibility Score : 22 / 100

22. Key Red Flags Identified

Major red flags include:

- unrealistic **fuel pricing**
 - new **low-credibility** website
 - **advance** payment structures
 - no verified **refinery** allocation
 - **informal** communication channels
 - template **transaction** procedures
-

23. Final Risk Rating & Investigator Conclusion

HIGH RISK SELLER

Although the company exists as a **registered trading** entity, the commercial offer displays numerous indicators associated with **petroleum trading scams**.

CONTACT: STOPOILSCAMS@GMAIL.COM

Confidential – For intended recipient only. Redistribution without consent is prohibited.

There is **currently no verifiable evidence** confirming the seller's ability to supply petroleum **products** at the volumes claimed.

24. Professional Recommendation

Buyers should **not** proceed with any transaction **until the seller** provides independently verifiable evidence including:

- **refinery** allocation documents
- terminal **storage** agreements
- **export** licenses
- **shipping** confirmations

If these **cannot be verified** through independent channels, engagement should be avoided.

25. Scope & Disclaimer

This report was prepared based on information provided by the **client**, **publicly available corporate records**, and analysis of the seller's commercial offer.

The findings represent an independent investigative assessment of **risk indicators** commonly associated with **fraudulent oil trading** operations.
